Non-GAAP Financial Measures

Management calculates non-GAAP operating income when evaluating the financial performance of the business. Travelzoo's calculation of non-GAAP operating income, also called "non-GAAP operating profit" in this press release and today's earnings conference call, excludes the following items: impairment of intangibles and goodwill, amortization of intangibles, stock option expenses, severance-related expenses. This press release includes a table which reconciles GAAP operating income to the calculation of non-GAAP operating income. Non-GAAP operating income is not required by, or presented in accordance with, generally accepted accounting principles in the United States of America ("GAAP"). This information should be considered as supplemental in nature and should not be considered in isolation or as a substitute for the financial information prepared in accordance with GAAP. In addition, these non-GAAP financial measures may not be the same as similarly titled measures reported by other companies.

Looking Ahead

We currently see a trend of recovery of our revenue. We have been able to reduce our operating expenses significantly. As a result of recovery of revenue and substantially lower operating expenses, we currently expect to achieve for Q4 a result close to break-even or a profit.

Conference Call

Travelzoo will host a conference call to discuss third quarter results today at 11:00 a.m. ET. Please visit <http://ir.travelzoo.com/events-presentations> to
